SUMMARY

Junior Data Science student at Oregon State University seeking opportunities in data analysis. Bring foundational Python and SQL skills and introductory internship experience in platform data planning and workflow setup. Curious about problem-solving and able to communicate in Mandarin Chinese and English.

EDUCATION

Oregon State University - Corvallis, OR

Bachelor of Science in Data Science

Relevant Coursework:
Python for Data Science, Introduction to Computer Science II, Linear Algebra for Data Science, Statistics, and Data Structures.

EXPERIENCE

Data Analyst Intern - Small Private Company

Summer 2026

• Assisted with platform data planning and organization to support company operations.

• Helped set up workflows and learned how information moved between tasks.

• Practiced basic SQL and learned to use a warehouse management system (WMS).

Python Programming Coursework - Oregon State University

2026

• Developed Python programs using functions, classes, lists, exception handling, and file input/output.

• Practiced reading and writing CSV files, building skills relevant to working with structured data.

• Used feedback from office hours to debug and improve Python programs.

SKILLS

Programming and Tools:
Python, basic SQL, C++, GitHub, Microsoft Word

Analytical:
Foundational statistical analysis, mathematical reasoning, problem-solving

Collaboration:
Teamwork, incorporating feedback, cross-cultural communication

Languages:
Mandarin Chinese (native), English (conversational)
